

The demand for replacement filters

With today's environment, filters are in growing demand for many applications, be it air, hydraulic or pneumatic applications.

STTOP Filters provides a solution engineered to suit your specific individual needs. With over 30 years of experience in the industry, Sttop Filters provides technical support along with a wide range of standard and custom filters.

In addition to supplying competitively priced off the shelf products, custom products can be manufactured at one of several sites situated throughout the UK. This includes the production of HEVAC associated items including Flexible Connectors used in ductwork.

Applications

STTOP filters provides support for a wide range applications in various market sectors including:

Chemical & Pharmaceutical

Printing

Healthcare

Manufacturing

Food & Drink Processing,
including the catering trade

Electronics

Spray booths

Leisure

Retail

Commercial

Andreae

The original made in Switzerland. Used in spraybooths, all types available.

Panel Filters

Panel Filters can be used for a broad range of applications in air conditioning and ventilation systems. Produced in card or metal frames in grades from G3 to F8, these filters are manufactured in standard sizes or to client's specification.

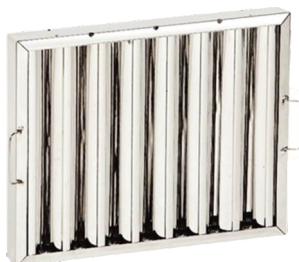

Process Bag

Process Bag filters in standard or made to measure designs are manufactured from an assortment of selected and tested filtration textiles. Used in many industries these are a cost effective alternative to cartridges.

Baffles/Grease filters

Used in the catering trade. Manufactured in a wide variety of sizes including non-standard. Handles are optional.

Multi-pocket Bag

Ideally suited for establishments requiring medium to high efficiency filtration (G4-F9), multi-pocket bags are available in many configurations.

Cartridge (Air and Liquid)

Available spun-Bound, Wound, Resin-Bonded or pleated cartridges are available to suit various world-class manufacturers.

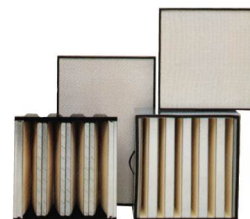

Belts

Belts are available in a wide range of cross sections and lengths. Suited for residential to heavy industrial use. Ideal for Machine tools, printing press, business machines, fans, blowers, and shop equipment.

HEPA

High Efficiency Particulate Air filters have been specifically developed for the collection of low micron and sub-micron particles in critical industries in order to control and contain contamination. Manufactured in wood and metal cases, deep or mini-pleat from H10 to U17 grades.

Flexible Connectors, Bellows and Chutes

Bespoke manufactured for use in applications varying from ambient air up to acid laden- up to temperature 400°C.

Rolls and Pads

Glass or Synthetic Media in roll or pad form for HVAC systems or spray booths.

Dust Extraction

Filter cartridges and bags to fit all makes and types of Dust Extraction equipment.
